

ApexPlanet Software Pvt. Ltd.

Data Analytics Internship — Task 3

Deep-Dive Analysis & Interactive Dashboarding

Prepared from the cleaned ApexPlanet sales dataset

Objective: define core KPIs, perform a deep-dive analysis of sales and customer performance, and present the results through an interactive dashboard.

1. Dataset Overview

Item	Value
Rows	1,000
Columns	12
Unique Orders	992
Unique Customers	947
Date Range	2025-01-01 to 2026-01-01
Categories	5
Cities	9
Products	6

Data quality: no blank values and no fully duplicated rows were found. There are 8 repeated Order_ID values, so distinct Order_ID is used for the order KPI.

2. Core KPIs

KPI	Result	Formula / Definition	Business Rationale
Total Sales	139,399,439.65	SUM(Total_Sales)	Overall sales value.
Total Orders	992	DISTINCTCOUNT(Order_ID)	Unique order activity.
Total Customers	947	DISTINCTCOUNT(Customer_ID)	Customer reach.
Total Quantity	5,435	SUM(Quantity)	Units sold.
Average Order Value	140,523.63	Total Sales ÷ Total Orders	Average revenue per order.

3. Sales Performance Analysis

Electronics is the highest-selling category at ■50,778,581.70; Fashion is the lowest at ■19,835,895.79.

4. Geographic and Customer Analysis

Patna has the highest city-level sales at ■19,285,966.89. Customer value segmentation is based on customer-level total sales.

Customer Value Segmentation

Segment	Customers	Sales	Orders	Avg Sales/Customer
Low Value	333	■ 10,383,641.88	333	■ 31,182.11
Medium Value	333	■ 37,264,072.60	333	■ 111,904.12
High Value	334	■ 91,751,725.17	334	■ 274,705.76

5. Key Findings

- Total sales are ■139,399,439.65 across 992 distinct orders and 947 unique customers.
- Electronics is the strongest category, contributing ■50,778,581.70.
- Laptop is the top product by sales at ■25,443,008.51.
- Patna is the leading city by sales at ■19,285,966.89.
- The highest monthly sales occur in March 2025, with ■13,059,899.94.
- Male customers account for ■72,463,550.63 in sales.

6. Business Recommendations

- Prioritize high-performing categories and products while monitoring monthly trends.
- Investigate leading cities for targeted campaigns and inventory planning.
- Use customer-value segments for differentiated retention and promotional strategies.
- Monitor Average Order Value alongside order count.
- Use dashboard filters to investigate date, city, category, product and gender performance.

7. Dashboard & Deliverables

Interactive dashboard: index.html (included in this package).

The internship brief asks for a BI-tool dashboard and a live dashboard link. This package includes a ready-to-host interactive HTML dashboard, but a Power BI .pbix/live Power BI link requires access to the user's own Power BI account and workspace.

Recommended GitHub files: index.html, ApexPlanet_Task3_Deep_Dive_Report.pdf, README.md and supporting chart files.
